Professional Summary

Motivated Front-End React Developer with 2 years of experience in building responsive and high-performance web applications using React, JavaScript, RESTful APIs, CSS, Design Systems, and HTML. Eager to collaborate with cross-functional teams, deliver exceptional frontend solutions, and stay updated with emerging trends in frontend development.

Experience

React Js Developer

JBVNL | Hyderabad, Telangana

Feb 2024 – Present

Project Description:

E-commerce SPA:

Developed a modern eCommerce web application using React.js with React Hooks and Redux for state management, ensuring a highly interactive and seamless user experience.

- Designed and implemented responsive web pages using React.js, HTML5, CSS3, and JavaScript, optimizing for speed and usability.
- Integrated Redux for efficient state management, enabling smooth handling of cart operations, user authentication, and product listings.
- Developed dynamic UI components and integrated API services for fetching product details, order management, and real-time updates.
- Implemented secure payment gateway integrations, allowing seamless checkout experiences with multiple payment options.
- Actively participated in Agile methodologies, including daily standups and sprint planning, to deliver features effectively.
- Applied design system principles and UI component libraries to maintain consistency and scalability across the application.

React Js Developer

Freelance Projects | Hyderabad, Telangana

Feb 2023 – Jan 2024

Build client-side applications using JavaScript, React.js. Employ Redux for state management, styled components and MUI for UI, and Tailwind CSS for styling. Integrate Firebase for backend functionality. Emphasize semantic coding style and SEO optimization.
